## Vital Statistics

Number of Employees worldwide: 1,800  
1993 estimated number of books to be published: 1,830  
In print titles: 8,005

Founded in 1807 by Charles Wiley, John Wiley & Sons is the oldest independent publishing company in North America. It began as a printing shop in New York City and in 1814 started publishing works by such leading novelists as Nathaniel Hawthorne, Herman Melville, Edgar Allan Poe, Margaret Fuller and Charles Dickens. In 1850, Wiley redirected the company resources toward publishing engineering and science texts recognizing the long term impact that the Industrial Revolution would have. By 1900 Wiley offered titles in twenty-nine areas of general interest ranging from agriculture to weights and measures.

Today Wiley is a global enterprise that develops and markets informational and educational products for the academic market in its college division, and for the professional, scientific, technical, medical, and consumer markets in its professional, reference, and trade (PRT) division. The **Ernst & Young Tax Guide** is Wiley's top-selling trade book. In the college division, Donald Kieso and Jerry Weygandt's **Intermediate Accounting**, the market leader, is sold not only in the United States but has also been adapted for the Canadian market. Strong backlist titles include Charles Ramsey and Harold Sleeper's **Architectural Graphic Standards** and the **Journal of Polymer Science**.

Wiley's strategy begins with the recognition that superior content is essential, no matter what instrument of delivery is used. Wiley is moving aggressively to deliver products by means of electronic technology. In the college division, Wiley introduced technology-based learning tools ranging from diskettes to electronic transparencies, hypermedia software and CD-ROM. In the PRT division, Wiley developed videotapes to illustrate medical procedures, delivered publications on diskette, and made journal content available online. Currently, Wiley titles have been translated into 37 languages.

Wiley has operations in New York, Chichester, Toronto, Brisbane, Singapore, New Delhi, and Tokyo. Wiley authors are recognized worldwide as leading contributors to their fields. Included in the list are 13 Nobel Prize winners, a Japan Prize winner, and many electees to their respective national academies. Wiley believes that education and technological progress are essential to a healthy society and that the industry can make a substantial contribution to its development. ♣
